

Website Design - html basics

Knowing a little bit of code helps.

`<html></html>` Creates an HTML document

`<head></head>` Sets off the title and other information that isn't displayed on the Web page itself

`<body></body>` Sets off the visible portion of the document

`<title></title>` Positions the name of the document in the title bar

`<body bgcolor=?>` Sets the background color, using name or hex value (web safe color #)

`<body text=?>` Sets the text color, using name or hex value

`<body link=?>` Sets the color of links, using name or hex value

`<body vlink=?>` Sets the color of followed links, using name or hex value

`<body alink=?>` Sets the color of links on click

`<pre></pre>` Creates preformatted text

`<h1></h1>` Creates the largest headline

`<h6></h6>` Creates the smallest headline

`` Creates bold text

`<i></i>` Creates italic text

`<tt></tt>` Creates teletype, or typewriter-style text

`<cite></cite>` Creates a citation, usually italic

`` Emphasizes a word (with italic or bold)

`` Emphasizes a word (with italic or bold)

`` Sets size of font, from 1 to 7

`` Sets font color, using name or hex value

`` Creates a hyperlink

`` Creates a mailto link (for email)

`` Creates a target location within a document

`` Links to that target location from elsewhere in the document

`<p></p>` Creates a new paragraph

`<p align=?>` Aligns a paragraph to the left, right, or center

`
` Inserts a line break

`<blockquote>`
`</blockquote>` Indents text from both sides

`<div align=?>` A generic tag used to format large blocks of HTML, also used for stylesheets

`` Adds an image

`` Aligns an image: left, right, center; bottom, top, middle

`` Sets the width of the image

`` Sets the height of the image

`` Sets size of border around an image

`<hr>` Inserts a horizontal rule

`<table></table>` Creates a table

`<tr></tr>` Sets off each row in a table

`<td></td>` Sets off each cell in a row

`<th></th>` Sets off the table header (a normal cell with bold, centered text)

`<table border=#>` Sets width of border around table cells

`<table cellspacing=#>` Sets amount of space between table cells

`<table cellpadding=#>` Sets amount of space between a cell's border and its contents

`<table width=# or %>` Sets width of table - in pixels or as a percentage of document width

`<tr align=?>` or `<td align=?>` Sets alignment for cell(s) (left, center, or right)

`<tr valign=?>` or `<td valign=?>` Sets vertical alignment for cell(s) (top, middle, or bottom)

`<td colspan=#>` Sets number of columns a cell should span

`<td rowspan=#>` Sets number of rows a cell should span (default=1)

`<td nowrap>` Prevents the lines within a cell from being broken to fit

Sample:

```
<html>

<head>

<title>unique as you</title> <meta http-equiv="Content-Type"
